

Bring the natural and human communities together

CONTROL THE BUDGET, KNOW THE POSSIBILITIES

Services:

- Natural Resource Initial Assessment
- Natural Resource planning, design, permitting and monitoring
- Mitigation planning, design, permitting and monitoring
- Stormwater management systems (aesthetic enhancement & mitigation values)
- Integration of human & natural communities
- Cost effective mitigation solutions

THE FACTS:

Initial Assessment

- over 30,000 acres

Permitted

- we have teamed with other consultants to permit hundreds of projects using a variety of strategies

Planned & Designed

- we have designed over 25,000 acres of native habitat on public and private properties

On-site Natural Resource Mitigation

- over 50 on-site natural/human community interface design/permit/build mitigation projects

Off-Site Natural Resource Mitigation

- over 200 successful natural resource design/permit/build mitigation projects

Stormwater

- over 500 acres of incorporated approved mitigation habitat into engineered stormwater detention basins

TOTAL MITIGATION PROJECTS

- over 25,000 acres planned & designed and 4000 acres constructed

Habitat Planning & Restoration Services: Since 1989
